Cann’t charge Surface Pro 4 (only if DC output voltage is 15V).

Charger Adapter Cable for Surface Pro.

Tips/Attention:
1. Never mix up DC12V and DC20V output.

Charging for other digital devices starts charging. \( \text{will power off automatically in } 30 \text{s if charging cable is disconnected.} \)

Power bank offers DC12V/2.5A power for other digital devices, after-sales service commitments 12 months warranty.

Safety Guidelines:
1. Please don’t bump/beat/shake the product, otherwise the internal circuit may get damaged.
2. Keep the product out of children’s reach.
3. Please charge power bank with easy access to water.
4. Don’t put this product into fire.

Product Accessory:

- AC charger:
- DC : A

Product Parameters:

- Product size:
- Cycle life:
- Charging time:
- Output:

Please check the label pasted on the adapter, if it is more than 100W (DC output current is more than 5A), it may cause our power bank turn off during charging for laptop. Slightly press the on-off button after connecting well, please choose an appropriate one for charging your laptop.

When match the output voltage port of power bank, do not mix up DC 12V and DC 20V output voltage, and danger.

Remark:

1. Pay attention: For ‘O’ connector, it is 7.4/0.6(7.4/5.0) connector. For Dell laptop with 7.4/0.6(7.4/5.0) connector, you can use your own USB cables for charging.

2. Output port: USB1 5V/2.1A, USB2 5V/1.0A, USB3 4.5/3.0, USB4 3.0/1.1.

3. Output port: 20.0V/5A, Output port: USB1 5V/2.1A, USB2 5V/1.0A.

4. Slightly press the on-off button after connecting well, press OFF-button: stay 2s for power off, press ON-button: fast turn on, LED indicates the remaining power.

5. LED lights in charging status:
   - 0-25%: LED1 lighting
   - 25%-50%: LED1, LED2 lighting
   - 50%-75%: LED1, LED2, LED3 lighting
   - 75%-99%: LED1, LED2, LED3 lighting, LED4 lighting
   - 100%fully charged: LED1, LED2, LED3, LED4 lighting

6. Auto turn off: turns off automatically in 30s if no load power bank.

You can use your own USB cables for charging.

FOR "O" connector, it is more than 100W (DC output current is more than 5A), it may cause our power bank turn off during charging for laptop. Please choose an appropriate one for charging your laptop.

We suggest fully charge our power bank every six months.

Applicable laptop brand:
- HP / COMPAQ
- ASUS
- NEC
- FUJITSU
- TOSHIBA
- SONY
- LENOVO
- Apple
- Brand of digital devices such as cellphone/laptop/DV.

Laptop Adapter List:

- DC 16.8V/2.5A Li-Polymer battery 50000mAh/185Wh
- DC 12.0V/2.5A
- DC 20.0V/5.0A
- DC 4.0V/1.7A
- DC 4.0V/1.35A
- DC 4.5V/3.0A
- DC 5.0V/1.7A
- DC 5.0V/1.5A
- DC 7.4V/0.6A
- DC 3.0V/1.1A
- DC 7.4V/0.6A
- DC 5.0V/1.0A

Remark:

1. Pay attention: Only professional technicians or designated maintenance service of power bank, and attach the other side to wall outlet.

2. Must follow the correct use of the product.

3. Pay attention: After-sales service commitments 12 months warranty.

4. Pay attention: The warranty period is 12 months.

5. Pay attention: Charging for laptop, not for Dell laptop, not for Dell laptop with 7.4/0.6(7.4/5.0) connector.

6. Pay attention: Auto turn off: turns off automatically in 30s if no load power bank. Do not mix up DC 12V and DC 20V output voltage, and danger.
